• Total Risk-Based Capital Ratio:	17.88%	10.00%

Richard M. Sanborn, President & Chief Executive Officer, commented, “We had a successful year on all fronts as we virtually eliminated all our non-performing loans, increased the strength of our balance sheet, improved our liquidity, significantly increased our capital position, returned to profitability, and have started to provide a return to our shareholders. Our decision to focus on SBA lending 18-months ago was the right decision and our SBA team has produced tremendous results, funding nearly \$100 million in loans to small businesses in 2010. The income from those SBA loans, both through interest income, and the gain we are able to record when we sell those loans, provided us with exceptional top-line revenue growth, and ultimately a year-end profit.” Sanborn continued, “While we still have concerns about current economic conditions, we are cautiously optimistic going into 2011 and beyond. Our business plan is working effectively and our pipeline of new business continues to be strong, which should allow us to deliver above average results. We certainly aim to continue the trend.”

Allan W. Arendsee, Chairman of the Board, stated, “Our whole team has done an absolutely tremendous job addressing issues and delivering on a plan to return the bank to profitability in a safe and sound manner. We are extremely pleased with the progress made and the focus on increasing shareholder value. The Board and management team are grateful to our shareholders for their continued support and patience over the last couple years and we look forward to delivering continued success.”
